#### CONCH-SHELL BUTTONS.

How Washington Came to Set the Fashion. It was possibly during his stay in New York in 1789 that Washington be-

new York in 1/59 that washington began to wear on his coat the concli-shell puttous, now in possession of Captain Lewis' daugher. A new fashion in dress, introduced by a President, is worthy of record, especially when there is an interesting story connected with it. This story, related by Robert Lewis, illustrates two strikingly characteristic traits of Washington—generosity

and economy.

A needy sallor with a wheelbarrow of shells accosted the General on the street, and, holding up a number of conchshells, implored him to buy them.

Washington listened with sympathy to the story of his sufferings and want, and the story of his sufferings and want, and the story of his sufferings and want, and kindly replied that he would buy them it he could in any way make use of them. Necessity perhaps sharpened the sall-or's wits, and he promptly suggested that they would make lovely buttons for his velvet coat. The General doubtless miled at the ingenious proposal, but agreed to try them. Carrying home his ocean treasure of pink shells, he sent for ufacture a useful article out of the pretty playtnings with which he found himself encumbered. The workman replied he could make the buttons if he could find an instrument sharp enough to pierce

Washington would have nothing use less about him, and so the suells were delivered to the manufacturer, who in due time returned them to him in the shape of concave buttons, a little larger than a quarter of a dollar, with a silver drop in the center hiding the spot where the eye is fastened beneath. The Presi-dent then astonished the Republican court by appearing in a coat with pink conch-shell buttons sparkling on its court by appearing in a coat with pink conch-shell buttons sparkling on its dark velvet surface. Eighty years ago, it seems, iashion ruled in the hearts, or over the costumes, of men and women. ust as it does now-for Captain Lewis pears testimony that couch-snell Dull court day in Mt. ## AN AUTOGRAPH COLLECTOR.

A celebrated collector of autographs is Mr. Benjamin Fillon, a citizen or La Vendee, who, during the last forty years, has gathered a series of letters and MSS. which are of great historical yalue. He is a man of fortune, of intelligence, and of perseverance; and has gratified, to the extent of his means and influence, his fondness for autographs, china, bric-a-brac.e.c. Connoisseurs in the ceramic art are indebted to him for several pamphlets throwing light upon the origin of different wares, and upon the life and works of great manufacturthe life and works of great manufacturers of porcelain. The description of his personnel is not prepossessing, yet here it is: "A short man, with pigeon breast, powerful shoulders, short neck, a round face like a bull-dog, big lips, prominent, black, flashing eyes." The sale of a portion of M. Fillon's collection of autographs has lately taken place in Paris, realizing a sum total of 38,501 francs. The highest price noted in the list of two hundred and innery-eight numbers disposed of was 1,500 francs brought by a letter of Sir Isaac Newton, dated 1719, letter of Sir Isaac Newton, dated 1719,

Mr. Lincoln was probably nearer to David Davis than any other person; those two men were much alike in the rough, broad grasp of their minds, and their fine, almost cunning, judgment. They seemed to look through a telescope and feel with the hand of a monkey. There were times when their triends hought both or them timid and vacillating, but that was because they were determined not to have an opinion and xpress it on every minor subject.
